

Gentlemen, Further restriction of airspace over the VERY RURAL Sacko-Grande strip, North of Katy , Texas, would destroy another location for airobatic flying in Texas. Controllers DRAGGING in traffic to IAH at the new proposed levels is NOT REAL.

Surely a little common sense is left in the FAA, and this proposed restriction will be waived.

If you want to pick up a load of GEESE and Ducks, Just start getting your traffic down under 4,000 feet from about December thru March in the Katy , Texas area, and you will make a lot of headlines on the dailey news.

Dan Nicholson
